

Forever Freedom

Description and Purpose

Forever Freedom, with a breakthrough formula, has combined the most complete range of nutrients on the market today, essential for the maintenance of healthy joint function and mobility. This tremendous combination drink maintains healthy joints and flexibility.

Forever has married the rich nutrients of our stabilised aloe vera gel with glucosamine sulphate, chondroitin sulphate, methylsulphonylmethane (MSM), ascorbic acid (vitamin C) and tocopherol (vitamin E).

Glucosamine sulphate and chondroitin sulphate are two natural substances that help maintain the structure and health of cartilage, keeping this natural 'shock absorber' well hydrated and the lubricating fluid within the joint at the necessary viscosity to allow one surface to glide freely over the other. As the body ages it loses its ability to produce healthy cartilage which makes it susceptible to wear and tear, especially in women, making this form of supplementation hugely beneficial.

At a glance...

- Unique formulation available in an aloe drink form to maintain healthy joint function and flexibility
- Increased bio-availability (better absorption) due to aloe vera carrier
- Ideal for sports people and the mature who wish to maintain healthy joint mobility

Vitamin C is necessary wherever healing takes place but is particularly important in the functioning of MSM; another natural sulphur-based substance found in virtually every cell in the body.

If you currently use the popular anti-inflammatory drug Ibuprofen, you should try the benefits of Forever Freedom. Taken daily, it can benefit sportsmen and women, the overweight and heavy manual workers.

Forever Freedom provides the usually recommended amounts of glucosamine sulphate (1500mg), chondroitin sulphate (1200mg) plus 750mg of MSM and 250mg of vitamin C per 120ml (4fl oz) serving.

Ingredients

Stabilised aloe vera gel, sorbitol, natural orange juice concentrate, fructose, glucosamine sulfate, chondroitin sulfate, natural orange flavour, methyl sulfonyl methane, antioxidant: ascorbic acid, citric acid, potassium sorbate, sodium benzoate, antioxidant: tocopherol.

Contains shellfish (shrimp, crab, lobster).

Contents

1 litre.

Directions

Shake well. Take 60-120ml, (2-4fl oz) daily.
